

Shop & Compare Tool

The tablet app is now available as a tool to help you walk consumers through their health care options with Covered California.

Where to get it:

The tool is available for download in both the Google Play and Apple app stores through the below links. Remember to rate the app – we appreciate your feedback:

Android & Google Play:

<https://play.google.com/store/apps/details?id=com.coveredca.CoveredCa&hl=en>

Apple iOS:

<https://itunes.apple.com/us/app/get-covered-ca/id674641644?ls=1&mt=8>

Chromebook:

<http://coveredca.com/fieldcalc/index.html>

How to use it:

The tool supports a five to ten minute conversation with a consumer to help them determine if they are eligible for a subsidy and what health plans may be available to purchase through Covered California.

At the end of August, the Enrollment Guide, a takeaway paper supplement for the consumer, will be available on the HBEX site for download as a PDF. The purpose of the Enrollment Guide is to capture the consumer's information provided during your five to ten minute conversation.

The tool can help:

- Browse high-quality health insurance policies in your region – with a range of coverage options and prices.
- Find out if the consumer may qualify for federal premium assistance or Medi-Cal.
 - Depending on their income, they may be eligible for a tax subsidy that pays for part of their premium.
- Visually explain if and how they might be eligible for a plan that helps pay for out-of-pocket costs such as doctor visits and medication.
- Walk through the health plan selection and enrollment process with consumers virtually anywhere.
- Serves as a reference tool in preparation for the field.
- Submit contact information for consumers requesting assistance with enrollment.

Information provided by the tool is estimated based on the information provided. The tool does not:

- Enroll consumer into a health plan.
- Perform any type of eligibility determination for consumers. All results are estimates, and show what a consumer may potentially be eligible for. The calculator does not factor in any type of eligibility information that isn't related to income.
- Perform any type of calculations for families with mixed eligibility.
- Supply Medi-Cal health plan options.
- Include information on the doctors or hospitals in the health plan networks

Below is the timestamp of the accompanying webinar recorded on August 14, 2013, for your reference:
